

GOFORD Statement California Proposition 65 Substances

As part of GOFORD's product stewardship, we continuously monitor the safety, health and environmental regulations' impact on the usage of products we manufacture.

California Proposition 65 is known as the Safe Drinking Water and Toxic Enforcement Act of 1986 . In 2016, the proposition was amended requiring businesses to provide Clear and Reasonable warnings to people in the state of California about chemicals known to cause cancer, birth defects or other reproductive issues. The warning requirement is based exposure and not chemical total content. It is, therefore, possible for a product to meet federal standards but still require a clear and reasonable warning.

Certain GOFORD's products may contain one or more chemicals listed in California Proposition 65. These chemicals are embedded in the homogeneous material and are not intended to expose any person during normal product use. Accordingly, the Prop 65 "clear and reasonable" warnings requirements do not apply to GOFORD products.
